

TABLE OF CONTENTS

1 OF 2

Grade 4 Multiplication

ACTIVITY	TOPICS	PAGE
Table of Standards		5
SECTION 1: 2-DIGIT BY 1-DIGIT MULTIPLICATION		
Professor Pancake	Use Concrete Models & Arrays to Solve Multiplication Problems	7
Animal Band	Use Concrete Models, Arrays, & Area Models to Solve Multiplication Problems	22
One Weird Menu!	Use Arrays, Area Models, & Partial Products to Solve Multiplication Problems	38
Hadley the Dog	Use Area Models, Partial Products, & the Standard Algorithm to Solve Multiplication Problems	54
Lots of Word Problems	Solve 2-Digit by 1-Digit Word Problems	70
Cranium Crackers	Use Mental Math to Multiply	87
SECTION 2: 2-DIGIT BY 2-DIGIT MULTIPLICATION		
Model Mania	2-Digit by 2-Digit Multiplication	97
Grids & Models	2-Digit by 2-Digit with Concrete, Array, Area Models, & Estimation	111
What Are You Doing?	2-Digit by 2-Digit with Area Models, Partial Products, & Standard Algorithm	124
Testing the Sparkle Box	2-Digit by 2-Digit Using Partial Products & Standard Algorithm	138
Perfect Squares	2-Digit by 2-Digit Using Partial Products & Arrays	143
SECTION 3: 3-DIGIT AND 4-DIGIT BY 1-DIGIT MULTIPLICATION		
Welcome to Elf Country	3-Digit by 1-Digit with Area Models, Partial Products, & Standard Algorithm	155
A Strange Cast of Characters	3-Digit by 1-Digit with Partial Products & Standard Algorithm	169
The Robot Assistant	3-Digit by 1-Digit with Area Models, Partial Products, & Standard Algorithm	174
Rocky Road	4-Digit by 1-Digit with Area Models, Partial Products, & Standard Algorithm	191
Lucy Dynamic's Invention	4-Digit by 1-Digit Using Partial Products & Standard Algorithm	205
SECTION 4: PUTTING IT ALL TOGETHER		
The Bone Rock Treasure Quest	Error Correction with All Grade-Level Numbers	210
Pursuing Patterns	Multiply by 10 & by 100	215
Multiplication Patterns	Multiplication Using Mental Math	222
Expression Connections	Multiplication Using Properties of Operations	232
Multiplication Model Differentiator	A Differentiation Tool for Modeling Multiplication Problems	239
Grid paper		247

Grade 4 Multiplication

Content and Instruction Extras

MEANING BEHIND THE MATH

Modeling Two-Digit by One-Digit Multiplication Using Concrete Models and Arrays	9
Modeling Two-Digit by One-Digit Multiplication Using Concrete Models, Arrays, and Area Models	24
Modeling Two-Digit by One-Digit Multiplication Using Arrays, Area Models, and Partial Products	40
Understanding the Properties of Multiplication	41
Modeling Two-Digit by One-Digit Multiplication Using Area Models, Partial Products, and the Standard Algorithm	56
Putting Algorithms in Their Place	57
Multiplication and Mental Math	87
Concrete, Pictorial, Abstract Models for Multiplication	98
Using Partial Products to Solve Multiplication Problems	125
Multiplication Fact Practice Without Tears	205
$\times 10$, $\times 100$—Patterns in Multiplication	216
Commutative Property	222
Associative Property	232
Distributive Property	233

READING, WRITING, AND SPEAKING TO IMPROVE CRITICAL THINKING

Sentence Frames for a Language–Rich Math Classroom	125
Helping Students Write Better Explanations—A Couple of Ideas	138
Using Word Walls to Build Vocabulary	144
The Academic Vocabulary of Multiplication	155

WORKING THE CLASSROOM

Using Templates as Tools for Differentiation and Equity	72
Technology Resources for Practicing Multiplication	72
Representing Student Thinking in the Process Standards	111
Teaching Students to Find Their Mistakes	169

TABLE OF STANDARDS

All of the activities in **Grade 4 Multiplication** address the following standard.

Number & Operations in Base Ten	
Use place value understanding and properties of operations to perform multi-digit arithmetic.	
4.NBT.A.5	Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.
